

“I just wish to thank you and your organization for the work that you do.

Early last year, mid-April, my wife and I were screened by your associates. The ultrasound showed my wife with an 85% or 90% blockage in her left carotid artery. Thanks to this testing, she was saved from a stroke or heart attack.

Her successful operation took place in May. Another gentleman also had a screening the same day and had surgery as well. The two of them often compare notes. My wife, prior to this problem, had no noticeable symptoms.

We “talk up” pre-screening to everyone we know and meet.

God Bless you and your organization.”

—R. Bragiel, Livonia, MI
January 2006

“I am thankful for the screening. It pointed me in the right direction in saving my life.”

—Tony Qutone

“Thank you for this opportunity of having the screening! I came back to Muskegon and followed through. It’s been three weeks since my successful surgery. Thank you again. Have a happy holiday.”

—June L. Dagen

“The service was absolutely the best. I couldn’t have been treated any better.”

—Zounna Bender

Prevention and Wellness Programs

for the 21st Century

Why Screen?

Because what you **DON'T** know
CAN hurt you!

Value in Partnership
with GE Healthcare.

Why Choose Prevention?

Peace of Mind

Every individual has the capability of taking complete control of their own health, by taking an active role in disease prevention. Why should they worry about strokes and other diseases when a few simple tests can put them at ease? And our unique education program will help them understand everything about their own individual health profile.

Knowledge is Power

Knowing how to eat right, exercise frequently, and obtain regular health screenings gives the power to maintain health as people mature. Knowing what is happening inside their body puts an individual one large step ahead of the disease process. The only way healthcare providers can help prevent strokes and other diseases is to know what is going on inside their patients' bodies. Screening tests offered by Advanced Screening provide this critical information.

Proven Effectiveness

The problem with many diseases is that they go undetected until it is too late. Many scientific studies have shown that detecting diseases such as carotid artery disease, aortic aneurysms, high cholesterol and peripheral artery disease early is the key in providing quick, life-saving measures to prevent strokes, heart attacks and other life-changing events. Nearly 50% of all strokes occur in people who show no prior symptoms. Advanced Screening offers effective screens to give people this information when they need it most.

Very Inexpensive

With the high cost of medical care, the financial impact of disease detection, prevention, and treatment becomes increasingly important. Several studies have shown that screening for strokes and other diseases in people without symptoms, instead of waiting for symptoms to occur, costs individuals and the healthcare system much less than through traditional methods. By using Advanced Screening's education and screening evaluations, hundreds to thousands of dollars can be saved by every individual.

Why Choose Advanced Screening?

Experienced Staff

Advanced Screening technicians and staff have performed over 100,000 screens during the past seven years. Their competence in performing accurate, efficient screens is unmatched throughout the state of Michigan, thus ensuring the highest possible quality for every screen done.

Immediate Results

All participants receive immediate preliminary results of their tests, and all results are reviewed by a board-certified physician following a screening event. Any individual with life-threatening findings are referred immediately to their healthcare provider. Actual copies of all results are given to clients at the time of their screening, so that this vital information can be taken to their physician.

State-Of-The Art Technology

We utilize the most advanced equipment currently available to perform our screens. With our partnership with GE Medical, we can offer the very best technology in medical diagnostic imaging, a critical component of the screening process.

Advanced Educational Program

Advanced Screening believes that clients must understand not only disease itself but also the entire disease detection and prevention process, in order to take full control of their health. We therefore emphasize comprehensive education with our state-of-the-art educational materials. Simplified explanations complete with computerized graphics help participants understand everything there is to know about their health.

Carotid Artery Screen

Utilizes ultrasound imaging to look into the artery for possible blockage. Each year 700,000 Americans have a stroke, the country's leading cause of disability and the third leading cause of death. Eighty-eight percent of strokes are ischemic, in which blood flow to the brain is blocked.

\$45.00

1

Abdominal Aorta Screen

Utilizes ultrasound imaging to measure the aorta for a possible aneurysm - an abnormal enlargement of the main artery in the abdomen.

\$45.00

2

Leg Circulation Screen

Utilizes Doppler ultrasound to determine possible blockages in the main arteries of the legs. Screens for Coronary Heart Disease. An Ankle Brachial Index is obtained to screen for possible peripheral arterial disease.

\$40.00

3

Package Pricing: Screens 1 - 3 = \$99.00 (Save \$31)

Heart Screen

Utilizes ultrasound imaging (echocardiogram) to evaluate the heart muscle, size, chambers and valves. Screens for possible:

- Valvular disease
- Enlargement
- Abnormal fluid
- Wall motion abnormality
- Damage from high blood pressure
- Congenital defects

\$80.00

4

Package Pricing: Screens 1 - 4 = \$179.00 (Save \$31)

Full Lipid Blood Cholesterol Screen

- Total Cholesterol
- High Density Lipoproteins (HDL) - Good Cholesterol
- Low Density Lipoproteins (LDL) - Bad Cholesterol
- Triglyceride
- HDL/TC Ratio

12 HOUR FAST REQUIRED

\$40.00

5

Package Pricing: Screens 1 - 5 = \$199.00 (Save \$51)

Electrocardiogram (EKG)

Utilizes the Elite Burdick II EKG unit - 12 lead computer-assisted interpretation of the electrical impulses of the heart.

\$40.00

6

Package Pricing: Screens 1 - 6 = \$239.00 (Save \$51)
